

I am a satellite radio subscriber and find significant value in the variety and quality of programming I receive. I particularly appreciate the traffic channel 210 in Boston as I cummute the Rt3 corridor. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I are permitted to hear or pay to receive. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM Radio's ability to provide the kind of programming that I value and require.
